

Sun as Skipped Step

The Sun as a skipped step indicates that a central part of the current life energy and purpose (the Sun) is to resolve the issues symbolized by the square to the nodal axis, through house and sign and through the node it resolves through. This placement indicates the current life as the critical one for the resolution of the unresolved material. This material is experienced in this life as part of the core nature of the individuality and sense of personal meaning. This placement has echoes of the symbolism of the hero's journey (Joseph Campbell *The Hero With a Thousand Faces*) and can involve the individual having to create or maintain a personal vision in isolation or in conflict with others around them in their life. As such it represents a challenge to individuate.
